Schedule your blood draw

93% of members say Superpower is more useful than an annual checkup

What traditional care misses vs. Superpower:

- Only test 10-15 biomarkers vs. 100+ with Superpower which creates a true baseline of your health
- Results interpreted against population average vs. tailored ranges based on your unique biology
- Told “you’re fine” unless something is critical vs. proactive and preventative health optimization
- 15min visits vs. unlimited access with deep context integrating with wearables and past records
- Receive paper report with no action plan vs. dynamic personalized action plan evolving with you
